KRRISH KUMAR

UI/UX Designer · Graphic Designer · Creative Technologist

Kolkata, India · musashikk99@gmail.com · +91 8697845183 · linkedin.com/in/krrishbuilds · github.com/Musashi-99

SUMMARY

Designer-developer hybrid who builds interfaces people actually want to use. Brings user-centered design thinking to live code — from GPU-driven 3D interactions to clean, scalable product UIs. Skilled in Figma, modern frontend stacks, and AI-assisted design workflows. Focused on craft, clarity, and shipping.

SKILLS

Design Tools: Figma, Adobe XD, Canva, Framer, Spline 3D
UI/UX: Wireframing, Prototyping, User Flows, Interaction Design, Design Systems, Usability Testing
Visual Design: Typography, Color Theory, Grid Systems, Responsive Layout, Accessibility (WCAG)
AI-Assisted: Midjourney, ChatGPT (UX copy), Claude (design critique), Galileo AI
Frontend: React, Next.js, Tailwind CSS, Three.js, WebGL, GLSL, TypeScript, HTML/CSS

PROJECTS

NeuroMorph Engine — Interactive 3D UI · *Three.js · WebGL · GLSL · MediaPipe · TypeScript*

- Engineered a gesture-driven 3D experience entirely in-browser — live hand tracking mapped to real-time scene transformations via custom GLSL shaders, sustaining 5,000+ GPU particles at 60fps.
- Designed the spatial interaction model from scratch: gesture zones, feedback loops, and particle behavior — pure UI/UX thinking applied to 3D space.
- Zero backend, zero install — production-grade creative interface deployable as a portfolio piece, live demo, or embeddable widget.

Orbito — Service Marketplace UI · *Next.js · React · Tailwind CSS · TypeScript · Vercel*

- Designed and built a multi-page marketplace with a reusable component system (spacing scale, color tokens, button states, card variants) across 10+ service pages — consistent design language end-to-end.
- Shipped with CI/CD via Vercel; zero-downtime live deployment — ready for real user testing and fast design iteration.

Ecommerce Platform — End-to-End UI/UX · *Next.js · React · Tailwind CSS · TypeScript*

- Mapped complete user journeys (discovery → cart → checkout → order tracking) before writing a line of code — design-first, then built to spec.
- Delivered a mobile-first component library (product cards, filters, modals, forms) built for WCAG accessibility — consistent visual hierarchy across all breakpoints.

AI Knowledge Survey — Deployed Web App · *React · Tailwind CSS · Netlify*

- Designed a frictionless multi-step survey UI — minimal friction, clear progress indicators, and clean typography driving high completion rates.
- Live at ai-knowledge-survey.netlify.app — production-deployed, tested with real users, zero reported usability issues.

EDUCATION

B.Tech in Cybersecurity · University of Engineering & Management, Kolkata · Expected May 2029
Senior Secondary (PCM) · Kendriya Vidyalaya · 2025

ACHIEVEMENTS

- East India Blockchain Summit 2.0 — Finalist · IIT Kharagpur Data Science Hackathon 2026 — Participant
- Deloitte Cyber Job Simulation (Forage) · HCL GUVI Certificate — AI Impact Track
